Taulant Sela

Senior Software Engineer

Struga, North Macedonia +389 70 477 300 taulant1995@gmail.com linkedin.com/in/taulantsela taulantsela.com github.com/TaulantSela

SUMMARY

I'm a senior software engineer with a master's in Software Engineering, working mostly with React, TypeScript and Next.js. I've worked on large client platforms such as Goodyear and BMG. At Hoyo Tech I'm also a Scrum Master and technical team lead, and I mentor junior developers and interns.

EXPERIENCE

Software Engineer · Hoyo Tech · Struga Sep 2020 – Present

- **Valtech** (contracted, Nov 2021 – Mar 2026, remote): frontend engineer on large client platforms.
  - **Goodyear:** multi-brand B2C platform on AEM in 30+ markets; helped move legacy React to TypeScript, hooks, RTK Query and Tailwind; embedded React in AEM through Web Components.
  - **BMG Production Music:** helped migrate the catalog and licensing platform from Angular 8 to Next.js 15 with server-side rendering; integrated Contentful and Harvest.
- **Technical team lead & mentor:** mentoring junior developers and interns; working with management on best practices and coding standards; requirement calls and feature demos with clients.
- **Citiline:** building a full-stack inventory app in Next.js and TypeScript for Citiline Restoration that tracks materials and tools at the shop and each jobsite, with roles for the office, foremen and drivers.
- **Parkber** (lead engineer): built a parking-management dashboard in React and Redux for users, roles, organisations and facilities, with monitoring and admin tools for daily operations.
- **Stepline** (lead engineer): developed a document-template platform in Angular and RxJS for law firms across Swiss cantons, for creating, customising and managing legal templates.
- **Hoyo Home** (smart-home platform for remote device control, scheduling, voice control and scenes): Scrum Master for the team, and also a developer on some of its features.

Software Developer · MonoChain · Pristina Jul 2020 – Apr 2021

- React web apps, a React Native mobile app (DIEM, now Twig) and Next.js landing pages.
- Node.js microservices with MongoDB, Elasticsearch, Redis and RabbitMQ on Docker / Kubernetes.

Data Scientist · Inspire11 · Tetovo Sep 2018 – Aug 2019

- ETL pipelines (SSIS, Matillion), data warehousing on Snowflake, dashboards in Tableau.

PROJECTS

Claude Semaphore github.com/TaulantSela/claude-semaphore

Published, open-source Claude Code plugin: a menu-bar traffic light that shows whether Claude needs you, is working, or is done. Distributed through the Claude Code plugin marketplace.

Go · Shell · GitHub Actions · macOS, Windows, Linux

Komshi komshi.vercel.app

Online ordering for neighbourhood grocery shops: each shop gets its own branded store and an order dashboard, plus an Expo mobile app for both customers and shop staff.

Next.js 16 · React 19 · Expo · Prisma · Neon

Watchcraft watchcraft-app.vercel.app

Design a watch step by step in real-time 3D and get the parts list to build it; a seller's dial photo goes straight onto the model.

Next.js 16 · React 19 · three.js · Zustand · Vitest

Pack It Up packitup.vercel.app

AI-assisted packing lists built from the destination, weather and planned activities.

Next.js 15 · OpenAI · Clerk · Prisma · Neon

Pizza Menu suhotel.fastbite.app

Multi-tenant digital menu for restaurants, running in production for Su Hotel Restaurant & Bar. Each venue gets its own subdomain, branding and menu managed in a CMS. Built with a collaborator.

Next.js 16 · React 19 · TypeScript · Sanity CMS · Tailwind CSS

Legion Training API legion-training-api.vercel.app

Multi-tenant REST API for gyms and coaches to manage workouts, members and progress, with role-based JWT auth, Swagger docs and integration tests.

Node.js · Express · JWT · Swagger · Jest

Elevator Simulator elevator-simulator-system.vercel.app

Real-time elevator simulator with a direction-aware dispatcher that serves hall calls before reversing, plus cabin controls and live status.

React · TypeScript · state machines

Master's thesis: React state management

Built comparable catalog, form and dashboard apps with different state-management approaches (Context, Redux Toolkit, Zustand), benchmarked them, and ran a developer survey.

React · Redux Toolkit · Zustand · Vitest

SKILLS

Frontend	TypeScript, React, Next.js, React Native, Angular
State & UI	Redux Toolkit, Zustand, Tailwind CSS, Storybook
Backend & data	Node.js, Express, REST, GraphQL, PostgreSQL, Prisma
AI	Claude Code, OpenAI API
Testing & tools	Jest, Vitest, React Testing Library, Docker, GitHub Actions, Vercel
Ways of working	Scrum, mentoring
Languages	Albanian, Macedonian, English

EDUCATION

MSc, Software Engineering · SEEU, Tetovo 2018 – 2026

BSc, Computer Science · SEEU, Tetovo 2015 – 2018
